# 1. GENERAL PRESENTATION

CURTI Lift is a company specialising in lift production, as residential and industrial, for private and public vertical transport.

Thanks to forty years of valuable experience and know-how we have been able to realise exceptional achievements. Most recently we produced the ANTISEISMIC LIFT.

The product range includes special, vertical and inclined plants, escalators and moving walkways.

Car Parking Systems, applications of Architectural Design Carpentry, made by steel and glass, complete the production offer.

## REVERSIBILITY

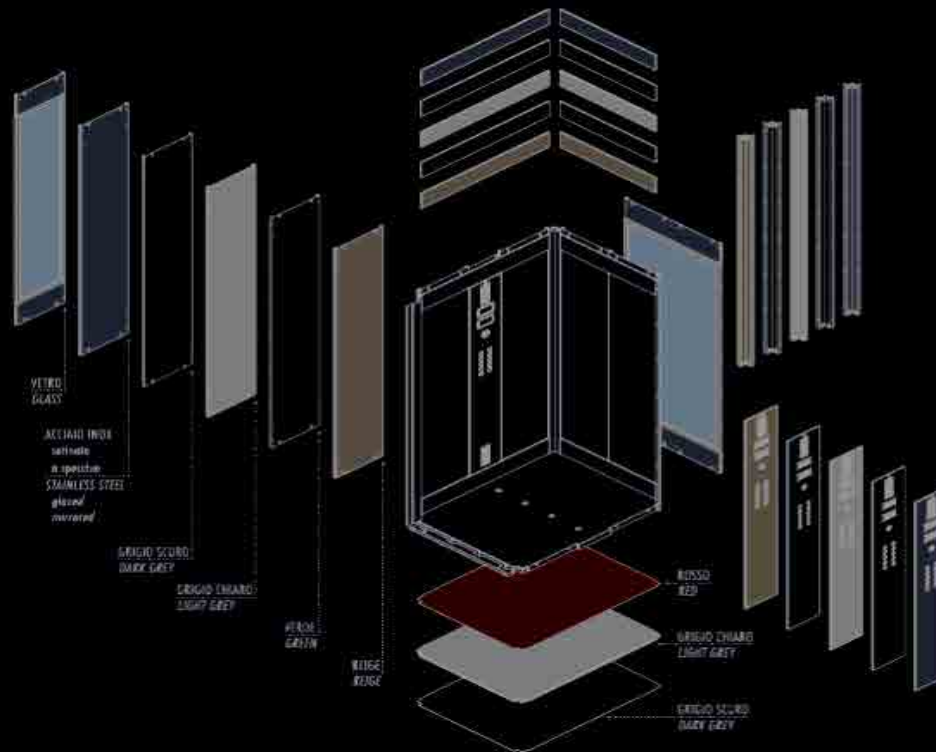

The way in which the front of corners are positioned determines the direction in which the door opens.

## CUSTOMISATION

Every element of the cabin can be modified. This allows an individual choice of panels, corners and horizontal sections to achieve an aesthetic, personalized and functional result.

# 4. LEONARDO CABIN – PROJECT

## COP COLUMN

The practicality of creating a column allows rapid repair/replacement interventions.

The weight of the cabin is 220.kg making it ideal as home-lift  
and for low energy consumption lifts

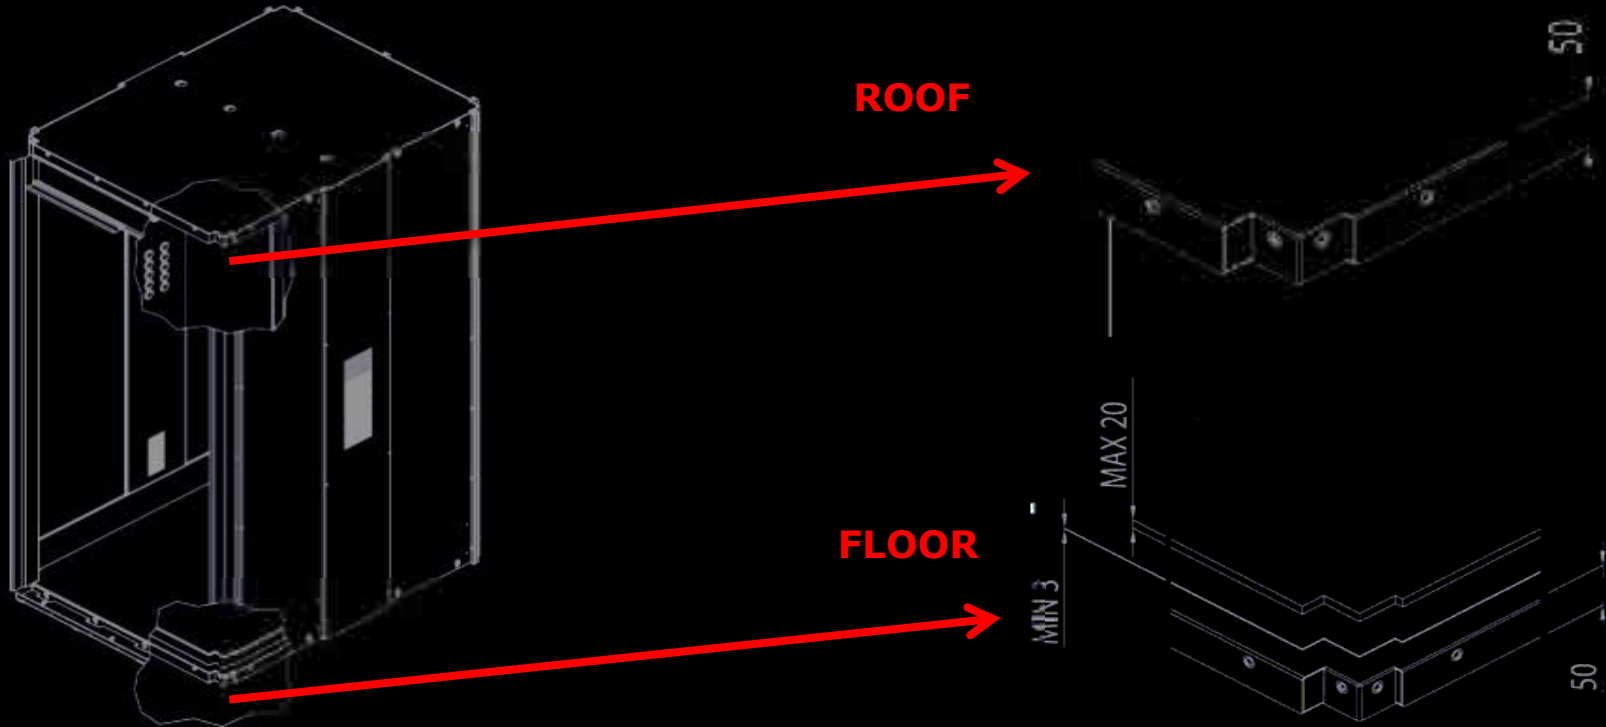

# 4. LEONARDO CABIN – PROJECT

## ROOF AND FLOOR

ROOF and FLOOR are made from the same components for economies of production. They are 50 mm thick, making the cabin ideal for reduced shaft system. LED LIGHTING for low consumption operation that makes the cabin ideal for low energy lifts. DESIGN of the floor cover allows it to vary in thickness up to 20 mm.
