

## STUDIO TIME s.r.l. SOCIETY PROFILE

Studio Time s.r.l. Is a Society established by a technical staff specialized in technologies, facilities, studies of production's methods and costs, industrial logistics and products' quality control.

Able to offer the client a good competence and a wide experience in estimating the priority of intervention on critical business departments, thanks to a collaboration with professional experts with whom we handle specific areas of the following fields: strategic analysis of business factors, research and application of new organizational and operative models, client assistance for resolution of environmental hygiene problems and work safety according to the in force laws.

Our experience wants to be a great contribution for the client, not only with the identification of new strategic lines which need to be followed, but also with their accomplishment and with a particular reference to processes of cultural change and functional integration, bringing in creative and specialized knowledge.

## WORKING SYSTEM

Our working system is based on the following concepts:

- importance of human resources in the business contest
- a team of highly specialized consultants
- approach based on the comparison of different ideas upon experiences and systems widely tested, not standard but specified for every client.

## ACTIVITIES ON FUNCTIONAL AREAS

### **PHISICAL ORGANIZATION**

- sizing stores
- analysis on the material flow and on the lay-out of the plants

### **METHODS AND TECHNOLOGIES**

- research and application of new production's methods
